Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS "I need professional advertisements that attract customers." "Creating ads for every platform takes too much time." "Hiring a copywriter is expensive for my business."		THINKS "I want better-performing ads to increase sales." "There should be an easier way to create marketing content." "AI should generate platform-specific advertisements."
	Abhishek <i>Businessman & Digital Marketer</i>	
DOES - Creates advertisements manually. - Uses multiple online tools for marketing content. - Runs campaigns on Google, Instagram, and Facebook.		FEELS - Frustrated by slow content creation. - Worried about low campaign performance. - Confident when AI generates high-quality advertisements quickly.
